

**Haulix** is an online digital promo system that can be accessed by you and your staff from anywhere in the world with an internet connection. There is nothing to install and it's so easy to use, there is no help manual needed.

## What can we do for you?

### **Security and Protection**

We automatically stick about a dozen inaudible watermarks in every track downloaded and streamed by your media contacts. Our watermarking technology is robust and can withstand conversions. You have total control of how many times and when your promos can get consumed by your contacts.

### **Advanced Tracking**

Our system tracks every movement that you and your contacts make. You will know exactly who is downloading your promos, and better yet, who isn't.

### **Downloading and Streaming**

Consuming music from Haulix is a painless experience for your contacts. They access your promos securely from a personal email invitation you send them. They can easily stream the songs on the page, stream the songs via an iTunes podcast or download the album as a compressed zip file.

### **Contacts and Invitations**

Organize your contacts in groups and generate attractive email invitations that are branded to your business. It doesn't matter if you have 100 contacts or 5,000. We take the heavy lifting out of generating, sending and tracking your invitations.

### **Staff Collaboration**

Whether your staff is in one office or scattered throughout many offices around the world, we make collaboration easy. Optionally create extra login accounts for other staff members. You can choose what they have permission to use and see or even assign them to one particular group of contacts.

### **Account Hibernation**

If you know you are going to have a slow month with no promo activity, why pay full price for services you aren't using? Simply "Hibernate" your Haulix account. During hibernation, you will still have access to reports and the watermark checker. We will continue to backup your data on a daily basis. Everything else will be temporarily shut down and you only have to pay \$5 USD per month. When you are ready to come back, login and un-hibernate your account. Everything will be instantly accessible and you go back to paying your regular plan fee.

**Next Page – Plans and Pricing**

**Haulix is a monthly subscription service. Upgrade, downgrade or cancel at any time. After your 30-day free trial, you will automatically get billed each month on your start day.**
